| 20 | In between two restaurants,if you uncheck permission of allowing combined order for a restaurant after adding items to cart,it doesn't show any warning for that changed feature at the restaurant which one still allows combined order. | * Open two restaurants in two tab
* Set permission of allowing combined order for both restaurants.
* Add item from both restaurants
* Now disable combined order feature for any of those two restaurants.
* The tab of disabled combined order restaurant shows warning for the changed feature,but the tab that still allows that feature,doesn't show any warning.
* Even you can complete payment too. | https://prnt.sc/xddxnd (allows combined order)
ttps://prnt.sc/xde8o6 (restricted combined order
